

# Domestic modular EV charging system

## The economical choice

The economical design is not over specified, EV-CS will install only the features you want. The modular construction provides for basic and complex requirements alike ensuring you have a quality product with easy operation and at a competitive price.

model WP1/13

### Compatible

WallPod is compatible with all of the UK's leading electric vehicle manufacturers' latest requirements, and is able to offer:

- 13 Amp domestic sockets
- 16 Amp BS54343 industrial sockets
- 32 Amp BS54343 industrial sockets
- J1772 sockets / connectors
- 16 Amp / 32 Amp IEC62196-2 Type 1 and 2 sockets / connectors
- Mode 1 - Mode 2 - Mode 3

### Future proof

WallPod has been designed to offer its own unique flexibility. Simply fix a WallPod to your wall or a mounting post and insert the pods to suit your electric vehicle. If and when you change your vehicle to a next generation model, you can simply change your pod to suit. It's simple and cost effective
